Projects

E-Commerce App, githup repo: <https://github.com/Ahmed-Seleem01/e-commerce-react>,
live-demo: <https://e-commerce-react-pied.vercel.app/> 🖱

Overview: Developed a fully functional e-commerce web application for learning and training purposes. The application features a modern and responsive design, providing a seamless shopping experience for users.

Features:

- User Authentication: Implemented secure user authentication and authorization using Firebase Authentication.
- Product Listing: Displayed products dynamically using Firestore, allowing users to browse and search through a wide range of items.
- Shopping Cart: Developed a shopping cart functionality enabling users to add, update, and remove items, with real-time updates and a smooth user experience.
- Responsive Design: Utilized Tailwind CSS to ensure the application is mobile-friendly and visually appealing across various devices and screen sizes.
- Routing: Used React Router for efficient navigation between different sections of the app, ensuring a smooth and intuitive user experience.
- Loader and Action: Leveraged React Router loaders and actions to fetch and manage data, reducing the reliance on **useEffect** and improving code clarity and performance.
- State Management: Managed application state effectively using React hooks, ensuring data consistency and improving performance.
- Multilingual Support: Implemented i18n for internationalization, supporting both Arabic, English and Spanish languages.

Challenges Overcome:

- Ensured optimal performance by implementing efficient data fetching and caching strategies.
- Enhanced user experience with responsive design and interactive elements.
- Dealing with firebase and its important APIs.

Technologies Used: React, Firebase, Tailwind CSS, React Router, JavaScript

Note App, github-repo: <https://github.com/Ahmed-Seleem01/note-app>,

live-demo: <https://ahmed-seleem01.github.io/note-app/> 

- Developed a note-taking application using vanilla JavaScript, HTML, and CSS.
- Implemented features such as creating and deleting notes, with a focus on user-friendly interface design.
- Utilized local storage for data persistence, ensuring that notes are saved between sessions.
- Ensured responsive design for optimal user experience across various devices.

Todo App, github repo: <https://github.com/Ahmed-Seleem01/todo-app>,

live-demo: <https://ahmed-seleem01.github.io/todo-app/> 

- Developed a todo application using vanilla JavaScript, HTML, and CSS.
- Implemented features such as adding and deleting tasks, as well as marking tasks as complete.
- Utilized local storage to persist tasks between sessions, enhancing user experience.
- Ensured responsiveness and cross-browser compatibility for seamless usage across different devices and platforms.
- Provide Drag and Drop feature to reorder tasks.

Education

Self-Taught in Front End Development

Intern at, Almdrasa

11/2023 – 05/2024

Front-End course that include html, css, javascript and react courses

CS50: Introduction to Computer Science

10/2021 – 12/2021

An introduction to the computer science and the art of programming.

Languages

- Arabic: Native
- English: Good written and spoken
